## SUMMARY

Motivated and eager-to-learn Information Technology graduate with internship experience in software development and technical support. Seeking an opportunity to begin my career as a Software Developer where I can apply my academic knowledge, gain industry experience, and contribute to reliable software solutions while continuously expanding my skills.

---

## EXPERIENCE

### Developer Intern / IT Support Intern

TGS BPO Incorporated

February 2026 - April 2026

- Contributed to the development and maintenance of the company Payroll System using Next.js and MongoDB.
- Implemented new features, resolved bugs, and participated in testing.
- Provided technical support and troubleshooting.
- Installed and configured software and office equipment.

### Freelance Software Developer

Self Employed

2025 - Present

- Developed custom web and mobile applications for clients based on project requirements.
- Built and maintained web app using PHP, JavaScript, HTML, CSS, and MySQL, as well as mobile app using Flutter and Firebase.
- Programmed ESP32 microcontrollers and integrated IoT devices with cloud services for real-time monitoring and automation.
- Collaborated with clients to gather requirements, implement requested features, test applications, and deliver functional software solutions.

---

## PROJECT

### AquaCare: Smart Arduino Fish Feeder with Real-Time Water Quality Monitoring and Water Change System (Capstone Project)

- Developed an IoT-based aquarium management system that automates fish feeding, monitors water quality in real time, and controls automated water changes.
- Built a cross-platform mobile application using Flutter for remote monitoring and device control.
- Integrated ESP32 microcontrollers, sensors, and actuators to collect real-time water quality data and automate aquarium operations.
- Connected the mobile application with Firebase for real-time data synchronization and remote access.
- Collaborated with a multidisciplinary team throughout the design, development, testing, and implementation phases.

### AgriFeed Solar – Smart Feeding System for Sustainable Piggery Production (Freelance Project)

- Develop the Flutter mobile application for monitoring and controlling the smart feeding system.
- Programmed the ESP32 microcontroller to communicate with sensors, actuators, and Firebase for real-time data synchronization.
- Implemented features for manual and scheduled feeding, feed level monitoring, and user profile management.
- Integrated Firebase Cloud Messaging and SMS notifications for feeding events and low-feed alerts.

---

## EDUCATION

### Bachelor of Science in Information Technology

Cebu Technological University – Tuburan Campus • 2026

- Cum Laude.
-

## SKILLS

---

Programming Languages: PHP, JavaScript, Java, C++, Dart

Frameworks: Laravel, React.js, Next.js, Flutter

Databases: MySQL, MongoDB, Firebase

Tools: Git, GitHub, Visual Studio Code, Android Studio, Arduino IDE

Soft Skills: Problem Solving, Teamwork, Communication, Adaptability, Attention to Detail

---
